I. READING COMPREHENSION

DIRECTIONS: Read the passage and for each question (1-12), choose the one best answer (A), (B), (C), (D) based on what is stated in or what can be inferred from the passage. Then, on your answer sheet, tick the letter of the answer you have selected.

Water scarcity poses a significant challenge to the Moroccan economy, impacting various sectors and hindering sustainable development efforts. As a country heavily reliant on agriculture, industry, and tourism, Morocco's economy is deeply intertwined with water availability and management.

Water scarcity profoundly affects agriculture, which employs a significant portion of the Moroccan population and contributes substantially to the economy. The sector relies heavily on irrigation, making it vulnerable to fluctuations in water availability. Insufficient water resources lead to reduced crop yields, decreased agricultural productivity, and income losses for farmers. Consequently, the agricultural sector's contribution to GDP (Gross Domestic Product) diminishes, affecting food security and rural livelihoods.

Industries such as textiles, food processing, and manufacturing require substantial water inputs for production processes. Water scarcity disrupts industrial activities, leading to decreased production output, increased operational costs, and loss of competitiveness in global markets. Moreover, industries reliant on water-intensive processes may face regulatory constraints and resource limitations, hindering their growth potential and economic contributions.

Water scarcity affects energy production, particularly hydropower generation, which contributes significantly to Morocco's electricity supply. Insufficient water resources limit the capacity of hydropower plants, leading to energy shortages and increased reliance on costly fossil fuel imports. Additionally, water scarcity poses challenges to water infrastructure development, including dams, reservoirs, and irrigation systems, hindering efforts to enhance water security and resilience.

Beyond sectoral effects, water scarcity exacerbates socio-economic disparities and vulnerabilities in Morocco. Rural communities, often dependent on agriculture for livelihoods, bear the brunt of water shortages, facing income losses, food insecurity, and migration pressures. Urban areas contend with water rationing, inadequate sanitation, and health risks, impacting quality of life and human development outcomes.

Addressing water scarcity is imperative for safeguarding the Moroccan economy's long-term viability and resilience. Mitigating the economic impacts of water scarcity in Morocco requires coordinated efforts and investments in water management, infrastructure, and policy reforms. Implementing efficient irrigation techniques, promoting water-saving practices in agriculture and industry, and investing in water recycling and desalination technologies can enhance water efficiency and resource utilization.

1. Which of the following is NOT a consequence of water scarcity in Morocco's agricultural sector?

A) Decreased crop yields
B) Reduced agricultural productivity
C) Increased reliance on rainwater harvesting
D) Income losses for farmers

2. What challenge does water scarcity pose for hydropower generation in Morocco?

A) Decreased energy production
B) Decreased reliance on fossil fuels
C) Limited capacity of hydropower plants
D) Enhanced water security

3. What is a potential consequence of decreased agricultural productivity due to water scarcity in Morocco?

A) Increased rural development
B) Higher food security
C) Income losses for farmers
D) Reduced reliance on imported goods

4. According to the text, what impact does water scarcity have on urban areas in Morocco?

A) Improved sanitation facilities
B) Decreased migration pressures
C) Water rationing and health risks
D) Enhanced quality of life

5. What is mentioned as a key strategy for mitigating the economic impacts of water scarcity in Morocco?

A) Ignoring policy reforms
B) Promoting water-intensive industries
C) Investing in water management and infrastructure
D) Expanding agricultural subsidies

6. How does water scarcity exacerbate socio-economic disparities in Morocco?

A) By reducing reliance on agriculture
B) By promoting rural development
C) By increasing income inequality
D) By enhancing food security

7. Which of the following is NOT suggested as a solution for addressing water scarcity in the text?

A) Implementing efficient irrigation techniques
B) Investing in water recycling
C) Promoting water-saving practices
D) Expanding reliance on unsustainable water resources

8. According to the text, what is the primary goal of addressing water scarcity in Morocco?

A) Enhancing water efficiency in industry.
B) Promoting rural migration.
C) Safeguarding long-term economic viability.
D) Increasing reliance on fossil fuels.

9. According to the text, how does water scarcity affect the competitiveness of Morocco's industries in global markets?

A) Increases competitiveness due to innovation.
B) Decreases competitiveness due to increased operational costs.
C) Has no effect on competitiveness.
D) Enhances competitiveness due to decreased production output.

10. What challenge does water scarcity pose for water infrastructure development in Morocco?

A) Increased availability of resources.
B) Hindering efforts to enhance water security and resilience.
C) Accelerating infrastructure development.
D) Decreasing reliance on water-intensive industries.

11. Which of the following is NOT a recommended approach for mitigating the economic impacts of water scarcity in Morocco?

A) Implementing efficient irrigation techniques.
B) Promoting water-saving practices in agriculture and industry.
C) Investing in fossil fuel extraction.
D) Investing in water recycling and desalination technologies.

12. Which of the following is NOT mentioned as a requirement for addressing water scarcity in Morocco?

A) Policy reforms.
B) Investment in water recycling.
C) Promotion of unsustainable practices.
D) Infrastructure development.

II. GRAMMAR AND STRUCTURE

DIRECTIONS: In questions (13-33) select the best answer (A), (B), (C), (D)

13. Identify the sentence with the correct grammar usage:

A) The company whom I work for is expanding its operations internationally.
B) The marketing team are preparing a presentation for the upcoming product launch.

C) Despite initial setbacks, the underdog team emerged victorious in the championship.
D) The project manager was praised for his innovative approach to problem-solving.

<u>Directions</u>: This section contains 2 passages, each followed by a number of questions (49-60). Read the passages and for each question, choose the one best answer (A), (B), (C), (D). Then, on your answer sheet, tick the letter of the answer you have selected.

<u>PASSAGE 1:</u>

The economy of eastern Europe has undergone significant changes over the past two decades. Twenty years ago, the main industries were completely nationalized, and many companies were owned by the **(49)** _____. These state-owned enterprises did not operate efficiently due to **(50)** _____ hurdles, lack of competition, and mismanagement.

Now, governments in the region are attempting to **(51)** _____ these industries, but the process is fraught with challenges. Finding willing **(52)** _____ has proven to be difficult, as people are hesitant to invest in the old, struggling companies. However, there is a growing willingness among some individuals to **(53)** _____ their money into new ventures, and there are promising signs of a budding entrepreneurial **(54)** _____.

49. A) nation	B) state	C) country	D) enterprise
50. A) automatic	B) diplomatic	C) bureaucratic	D) autocratic
51. A) privatize	B) nationalize	C) enterprise	D) culture
52. A) corporations	B) firms	C) investors	D) owners
53. A) save	B) risk	C) sell	D) stock
54. A) culture	B) commerce	C) concern	D) Society

PASSAGE 2:

The world is facing a pressing environmental crisis due to the rapid **(55)** _____ of natural resources and increasing levels of pollution. In response to these challenges, governments, businesses, and individuals are seeking innovative solutions to promote sustainability and mitigate the impacts of climate change.

One area of focus is the transition to renewable energy sources such as solar and wind power. These clean energy alternatives offer a viable **(56)** _____ to traditional fossil fuels, reducing carbon emissions and dependence on finite resources.

Another key aspect of sustainability is the promotion of **(57)** _____ practices in agriculture. By adopting organic farming methods and reducing reliance on chemical fertilizers and pesticides, farmers can protect soil health, biodiversity, and water quality.

In urban areas, efforts are underway to promote **(58)** _____ transportation options such as biking, walking, and public transit. These initiatives aim to reduce traffic **(59)** _____, air pollution, and greenhouse gas emissions associated with car use.

Furthermore, there is growing recognition of the importance of **(60)** _____ consumption habits among consumers. By choosing products with minimal packaging, opting for reusable items, and supporting eco-friendly brands, individuals can contribute to a more sustainable future for generations to come.

55. A) depletion	B) augmentation	C) increment	D) accumulation
56. A) alternative	B) substitution	C) replacement	D) exchange
57. A) friendly	B) sustainable	C) traditional	D) harmless
58. A) non organic	B) green	C) high carbon	D) environmentally-friendly
59. A) run	B) congestion	C) flow	D) drift
60. A) conscious	B) aware	C) mindful	D) responsible
